

Student Internship* in Pharmaceutical Market Research (100%)

impulze is a Swiss-based healthcare consulting company focused on primary market research (PMR) for 'big pharma' industry, supporting medical and commercial teams behind current blockbuster drug brands.

As an intern you will work with our experienced market research analyst team. You will be able to utilize your proficient **Excel** (basic programming knowledge, especially R, is a plus), **PowerPoint**, and language (**fluent English and basic German** required, French an advantage) skills in data analysis and reporting.

Your **background in life sciences** and general interest in the pharmaceutical industry will allow you to **put market analytics into context** and build a basis for understanding pharmaceutical marketing.

Our student internship opening is a temporary position of 3-6 months, starting immediately. To apply please e-mail your CV and a short motivation statement to recruiting@impulze.ch

*Please check potential compatibility with ETH requirements for accredited practical experience with your department directly
